

NAWEA 2013 Symposium Boulder, CO

NORTH AMERICAN WIND ENERGY ACADEMY

Session Speaker

Andrew Magstadt, University of Wyoming
Aeroelasticity in Dynamically Pitching Wind Turbine Blades

Andrew Magstadt is a graduate student of Mechanical Engineering at the University of Wyoming. He received Bachelors' degrees in Mechanical Engineering and Physics in 2011 and is currently finishing up his Master's this fall. His research interests include experimental fluid mechanics, unsteady flows, and aeroelasticity. Upon the completion of his schooling, Andrew sees himself actively playing a role in the industrial research of aerodynamics and wind energy.

A native of Wyoming, Mr. Magstadt is an outdoor enthusiast. When schoolwork, the lab, and research permit, he enjoys bicycling, backpacking, wakeboarding, and downhill skiing. Exceptions are made on powder days.
