NORTH AMERICAN WIND ENERGY ACADEMY

Session Speaker

Raj Rai, University of Wyoming

Effects of Varying Temporal and Spatial Scale Turbulent Inflow on Wind Turbine Performance

I did my undergraduate from Tribhuvan University, Nepal (1999) and masters from Northern Arizona University (2007) in Mechanical Engineering. In 2008, I worked as a mechanical engineer at Piping Technology Inc, Houston, Texas. I joined my PhD at the University of Wyoming in 2009 and am expecting to graduate in August 2013. My research interests include wind resources, wind turbine dynamics, and atmospheric turbulence modeling.
